About Us

At ParkIt, we are passionate about revolutionizing the way people experience parking and transportation. Founded during the early-covid period by a group of young entrepreneurs, our next-generation smart technology company is committed to creating innovative solutions that simplify and enhance the parking ecosystem for commercial and residential properties.

Our vision is to transform the parking and transportation landscape, making it more sustainable, efficient, and user-friendly. We strive to deliver innovative solutions that simplify the everyday lives of individuals and improve the overall well-being of communities.

Smart Parking Solutions

- *For Residents*

- For residential properties, we provide tailored smart parking automation solution that enhance convenience and security.
- Similar to our commercial solution, we enable access only to registered vehicles, ensuring exclusive parking for residents.
- Additionally, residents have the flexibility to add guest vehicles, granting temporary access as needed.
- Our advanced technology optimizes parking space allocation, reduces congestion, and provides residents with a hassle-free parking experience.

SMART PARKING **SOLUTION**

(FOR RESIDENTS)

Vehicle Entrance

Vehicle enters the residential complex.

Vehicle Entrance Permitted

Boom Barrier opens automatically to allow the vehicles enter the premise on its successful recognition.

Database of Registered Vehicles

Vehicle numbers or FASTAG of the residents shall be registered in the database.

Vehicle Recognition

Our ANPR Cameras or RFID Readers detect whether vehicles are registered and have space in real time.

Vehicle Entrance Prohibited

Vehicles would not be permitted to enter if it is not registered or has insufficient spaces.

Space & Slot Management

The count of occupied spaces of a resident or company increases with entry and reduces with exit in real time.

Smart Consumer App

Residents or companies can invite guest/visitor vehicle via registered mobile number. They can also view logs on mobile app

Security Dashboard

View parked vehicles, registered visitors' vehicle, identify wrongly packed vehicle.

Smart Parking Solutions

- *For Commercials*

- Our smart parking automation solutions for commercial properties offer seamless access control and efficient parking management.
- By allowing only registered vehicles and a limited number of registered vehicles to enter the premises, we ensure optimal utilization of parking spaces.
- With real-time monitoring and guidance, we eliminate the hassle of searching for parking spots, enabling a smooth parking experience for employees, customers, and visitors.

SMART PARKING **SOLUTION**

(FOR COMMERCIALS)

Vehicle Entrance

Vehicle enters the commercial complex.

Vehicle Entrance Permitted

Boom Barrier opens automatically to allow the vehicles enter the premise on its successful recognition.
