# About Us

At ParkIt, we are passionate about revolutionizing the way people experience parking and transportation. Founded during the early-covid period by a group of young entrepreneurs, our next-generation smart technology company is committed to creating innovative solutions that simplify and enhance the parking ecosystem for commercial and residential properties.

Our vision is to transform the parking and transportation landscape, making it more sustainable, efficient, and user-friendly. We strive to deliver innovative solutions that simplify the everyday lives of individuals and improve the overall well-being of communities.

# Smart **Valet Parking** Solutions

- Our smart valet solution transforms the traditional valet parking experience into a seamless and efficient process.
- Using our smart technology, users can request their vehicles with ease, well in advance.
- By streamlining coordination between drivers, valets, and parking attendants, we minimize waiting times and enhance customer satisfaction.
- Whether in commercial or residential settings, our smart valet solution ensures a swift and reliable valet service.

SMART VALET

# SOLUTION 1.0

*(VALET DRIVER + VALET SUPERVISOR (OPTIONAL))*

## Vehicle Check-In

Valet driver captures an image of the number plate of the vehicle which gets converted to text via our in built ANPR software. He then feeds in the mobile number of the customer or lets the customer feed in their mobile number for discretion and clicks on check-in.

## Vehicle handover

Valet driver will click on OTP button on the app - where the customer will receive an OTP to authenticate/validate and then upon handover the vehicle will be checked out.

## Dashboard

The restaurant / hotel will have access to all logs of vehicle numbers with driver name & check-in check out time. and mobile number of customer

## Customer Entry

Customers arrive at the premise

## SMS Notification

Customer receives an SMS as proof of parking with a CALL FOR CAR button which can be used 10 minutes before leaving premises to call for their vehicle. Customer can also see their queue number upon calling for vehicle

## Simplified Supervision

Valet supervisor can allocate the cars during check-in to a driver - a dropdown list of drivers of that premises shows up.

SMART VALET

# SOLUTION 2.0

*(VALET DRIVER + RESTAURANT MANAGER)*

## Vehicle Check-In

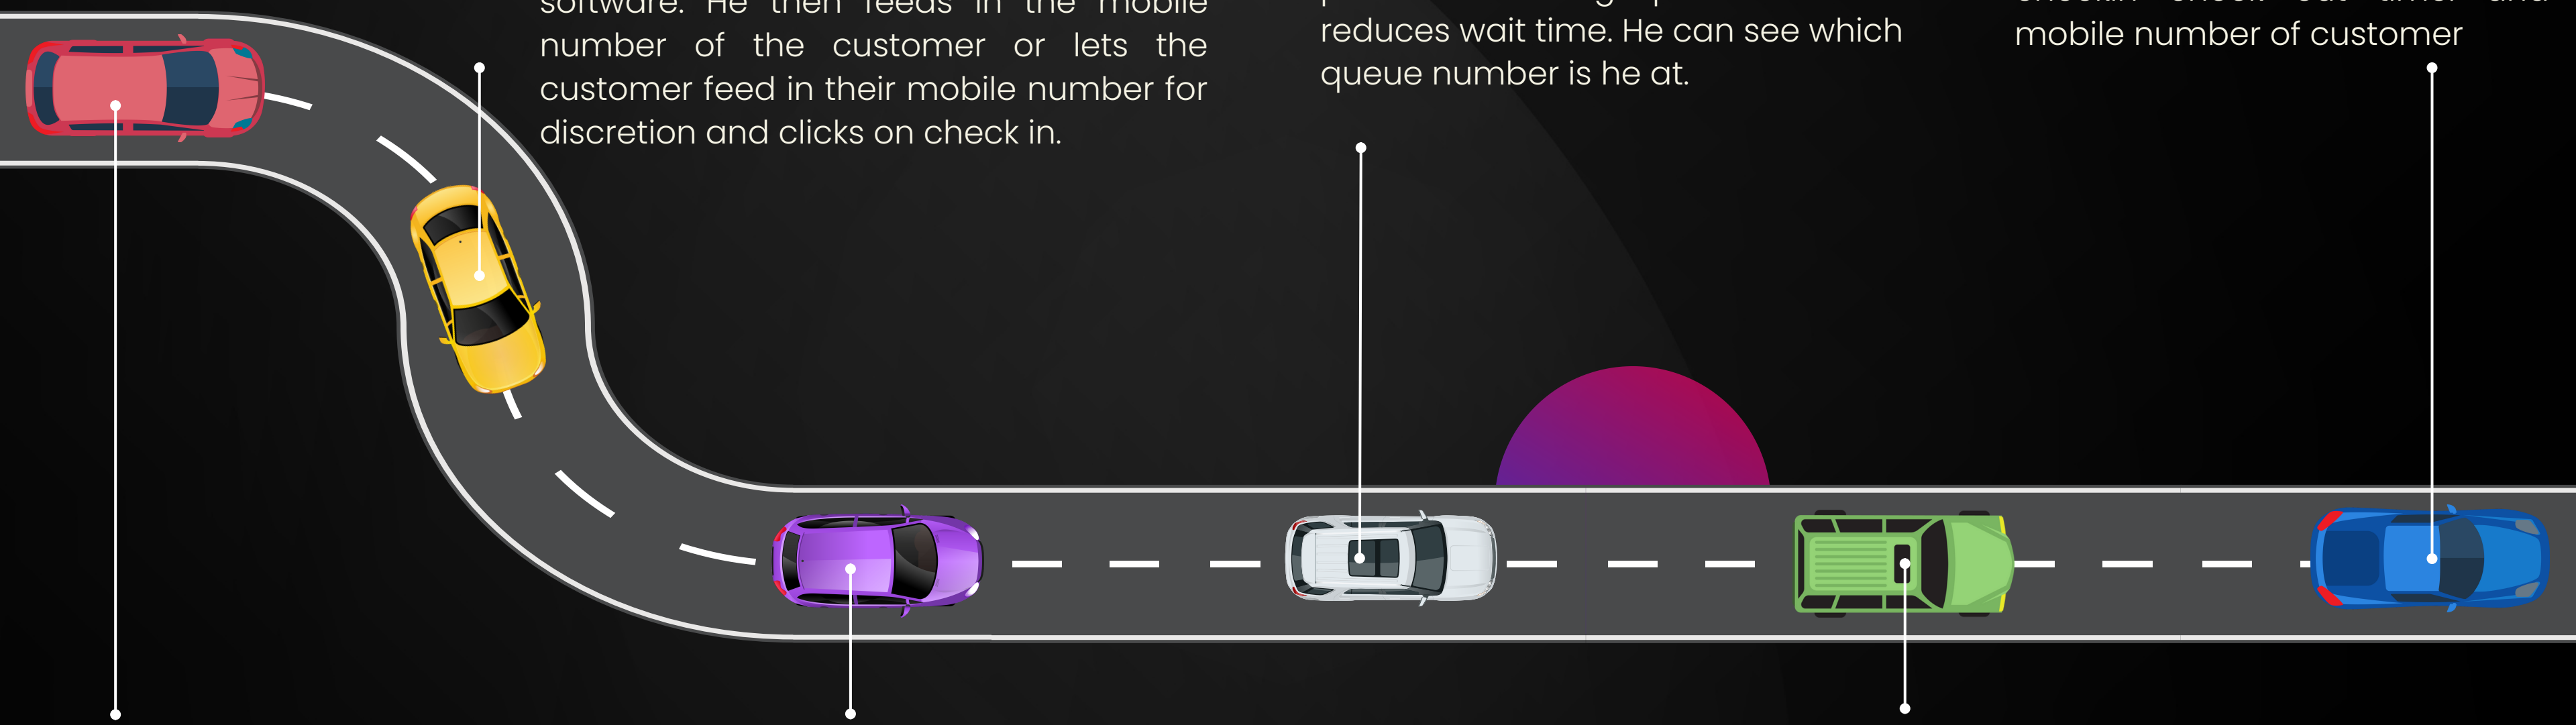

Valet driver captures an image of the number plate of the vehicle which gets converted to text via our in built ANPR software. He then feeds in the mobile number of the customer or lets the customer feed in their mobile number for discretion and clicks on check in.

## Restaurant Manager

The restaurant staff has to validate the QR upon which the customer gets access to CALL FOR CAR 10 mins prior to leaving premises. This reduces wait time. He can see which queue number is he at.

## Dashboard

The restaurant / hotel will have access to all logs of vehicle numbers with driver name & checkin check out time. and mobile number of customer

## Customer Entry

Customers arrive at the premise

## SMS Notification

Customer receives an SMS with QR code which needs to be validated by restaurant staff as proof of visit.

## Handover

Valet driver will click on OTP button on the app - where the customer will receive an OTP to authenticate/validate and then upon handover the vehicle will be checked out.
